Proposal

Author/Illustrator: Roxie Munro

Format: Board books, approximately 6" x 6." 16 to 24 pages (8 to 12 spreads). A single large lift-the-flap per spread, or several per page. Bright, colorful, "realistic" nature illustrations (see 1-minute video art sample at <https://www.roxiemunro.com/board-book-proposal.html>).

Ages: 2 through 5 years old

Overview: Librarians have suggested I do board books. They cite a need for STEM and/or nonfiction books for younger children (I've done many large format nonfiction picture books for ages 5-10/K through 5th grade) - books on nature and science, about birds, snakes, bugs, rodents, coral reef creatures, rainforest animals, many specific ecosystems, dinosaurs, and more. My work is realistic, colorful, and accessible with an element of whimsy.

Young children recognize and appreciate art. I don't "talk down" to them visually. Librarians have said they are tired of depersonalized obviously computer-generated and cartoon-y art. Generic or stock photography is not always clear, compelling, and satisfying (or unique). Children "read" art with their caregivers; they are "visual learners." Good lively correct illustrations with a fun attention to detail with simple text is critical.

Could be lift-the-flap(s) with a Q&A format. The art will have surprises, maybe some gamification (hidden elements, seek-n-find), and action. (See four 1-minute videos of rough B&W dummies on sea/coral reef creatures, rainforest, mice and more, and dinosaurs at <https://www.roxiemunro.com/board-book-proposal.html>)

Competition: "Dominated by licensed titles" (quoting a librarian). Also concept books (usually a series developed by publisher): ABCs, Counting, Colors, DK, etc with bright simple artwork. There are some books with cartoon-y dinosaurs, generic rainforest animals, fish, etc.
